WHO WE ARE

Tatva means essence — the true nature of a thing. That's what we export: fruits and vegetables dried and preserved close to their source, not stripped of what made them good in the first place. Built in Indore by a team that came from food service before export. We know what buyers on the other end are actually looking for.

Why Trade With Us

- Direct sourcing, no middleman layers
- Consistent quality across 45+ SKUs
- One point of contact, fast response — not a call center
